

# Bachelor of Business (Accounting) now offered at Sydney

The Charles Sturt University Study Centres are operated by Study Group Australia. Study Group are global leaders in international education and training across five continents. Charles Sturt University and Study Group are committed to the provision of outstanding education opportunities and work together to provide these at the Study Centre locations.

The Bachelor of Business (Accounting) specialisation prepares you to become a professional accountant. It covers theoretical and conceptual accounting matters and teaches you the accounting skills necessary to make you employable in a variety of settings.

This degree is accredited by both the Certified Practising Accountants (CPA) Australia and the Institute of Chartered Accountants in Australia. Graduates are eligible for associate membership of CPA Australia (ASA) which is a requirement for entry into the CPA program. Graduates are eligible to enter the Certified Accountant (CA) Program conducted by the Institute of Chartered Accountants in Australia. Graduates are eligible to join the Association of Taxation and Management Accountants at the Member level, without further study.

## KEY BENEFITS

- ❑ Student support – comprehensive subject outlines to support lectures and tutorials.
- ❑ Library facilities – library systems and databases to access current research materials in the extensive Charles Sturt University Library network.
- ❑ City centre locations – The Charles Sturt University Study Centres are located in the city centre, located close to train stations and other public transport facilities.
- ❑ Excellent teaching staff – teaching staff are highly qualified academics with substantial relevant industry experience, ensuring both academic integrity and real world focus.
- ❑ Smaller classes – tutorial style teaching means students receive individual personal attention, helping them achieve greater success. Our students thrive in this supportive environment.

## ENGLISH LANGUAGE REQUIREMENTS

- Academic IELTS 6.0\* (no band less than 5.5)
- TOEFL Paper 550 (TWE 5.0)

### ELECTIVE SUBJECTS (6 SUBJECTS)

An elective subject is any undergraduate subject offered by CSU, provided prerequisites and enrolment restrictions have been met. In order to graduate, the number of Level 1 subjects cannot exceed 12.

**ACC100 Accounting 1: Information for Business**  
Accounting 1 is an introductory subject designed to provide all business students with an overview of how accounting data is processed into accounting information.

**ACC110 Accounting 2: Management Decisions**  
Examines the use of accounting information in management decisions applicable to local and global economies.

**ACC200 Accounting Systems**  
This is an introductory accounting information systems subject designed to provide students with an overview of computerised accounting information systems (AIS), some practical skills in using an AIS, and an understanding of the scope and types of different AISs.

**ACC210 Management Accounting 1**  
Examines the way in which accountants provide financial and other information for managers to use within organisations.

**ACC222 External Reporting**  
In an international context this subject deals with company formation, changes in a company's capital structure and the statutory and professional financial reporting requirements of incorporated reporting entities.

**ACC310 Management Accounting 2**  
Emphasises the role of management accounting in decision making, particularly in providing information and analysis to support strategic management activity.

### ACC322 Company Accounting

In the context of the internationalisation of accounting this subject deals with the corporate form of business organisation, the form and content of corporate financial statements, and how to account for: taxation of company profit; acquisition of another entity; and expansion into an economic entity (parent-controlled entity; and investor-investee relationships).

### ACC331 Auditing & Assurance Services

Adopts a risk-based approach to auditing and assurance services, exploring the practice and theory of auditing as it applies to Australia within a global environment.

### ACC341 Accounting Theory

An integrative subject designed to give students an understanding of theory relating to the development of the accounting discipline as it exists today in the global economy.

### ECO110 Microeconomics

This subject introduces a range of core microeconomic principles to students assuming no previous knowledge of economics.

### ECO120 Macroeconomics

Macroeconomic concepts and principles are used to study the structure and performance of the Australian economy.

### FIN211 Financial Management

This subject introduces the student to the principles of financial management from a corporate perspective.

### LAW110 Business Law

Examines major features of the Australian Legal System by analysing, describing and researching its structure, creation and interpretation.

### LAW220 Business Organisations Law

This subject examines the modern law of business organisations with emphasis on The law of trusts, The law of partnerships and The law of corporations.

### LAW301 Taxation Law (Principles)

The fundamentals of income tax law and practice are covered. The basic ideas of assessable income including capital gains, allowable deductions and the essentials of tax accounting are examined in the context of their impact on businesses and taxpayers in general. Goods and Services Tax and Fringe Benefits Tax are also considered.

### MGT100 Organisations and Management

This subject examines the philosophy and role of management within organisations. The various aspects and functions of management are analysed so that students can apply management principles and practices within both public and private sector organisations.

### MKT110 Marketing Principles

Examines the philosophy and role of marketing as a management discipline. Elements of the marketing process are examined so that students can apply marketing principles and practices to service and non service organisations in the public and private sector.

### QBM117 Business Statistics

This subject describes how statistical tools can be used by decision-makers in business environments. Statistical techniques are applied in typical business situations using the computer where appropriate.
